

1860 Farms H Series Bulls September 2022

1860 GB Fireball 672 H021, Reg: AAA *19949205, Bull, Birth Date: 09/11/2020 Tattoo: H021

DNA Tested, Parentage: SNP, Genomic: Angus GS, Parents Qualified

H021, we nick name this one “en fuego” because he is on fire, sexy and performing extremely well, he is “en fuego”! All of GB Fireball’s Top performing calves are on fire around the country. I just watched lot 163 a Fireball bull calf at the GAR sale go for \$50,000. Lot 136 was nice, but was he that \$\$\$\$ much nicer than “en fuego” here? You be the judge “En fuego” has 9 - EPD’s in the Top 4% (7 in the Top Three Percent) of the Angus Breed (non-parent) on the day he was born. Add to that, the balance this bull brings to your herd and you may have just saved yourself some serious change and have a bull that is very imposing, striking & daunting genetically as well. We bred GB to a Spruce Mtn Primrose girl that adds in some very nice genetics from Connealy, GAR, Sitz & SAV rounding out a very selected group of genetics from some of the Angus Pathfinders you’ve been looking for. He retains the very **impressive C.A.B. Certified** Genetic markers that he will pass on to his progeny.

GB Fireball 672 (H021’s sire) has sure fire calving ease, carcass quality and added performance. Now combined that with double digit Calving Ease, top 10% growth and you have a big-time curve bender spread. He offers a combination of Marbling and Rib Eye Area EPDs that are unmatched by any other active sire in the Angus breed today, also a significant sire line to use for advantages for foot quality, muscle and \$Beef. His +346 \$Combined index and +16 CED puts him among the top active multi-trait sires in the breed today.

Priced; \$8,500

1860 GB Fireball 672 H024, Reg: AAA 19949196, Bull, Birth Date: 09/22/2020 Tattoo: H024

DNA Tested, Parentage: SNP, Genomic: Angus GS, Parents Qualified

H024 has those incredible **C.A.B. Certified Genetics** that you want in your next herd bull. Why? Because buyers will pay you more for your calves, because they get paid bonuses from their buyers for those C.A.B. Certified Genetics. Let’s design the perfect bull; Let’s start with a fair price but more important a great value for the investment. Next, Calving Ease is always nice but only if you can get some gain on those calves, so add that in as well. Then I want an option to sell at Weaning Weight or if the markets not great hang on to those calves and sell at Yearling Weight. I would like to steer one or two for the family and friends so those C.A.B. Certified genetics will make for better home-grown beef (a lot better). Ooh and I want improvement in every category in my heifers that I am going to retain 100% of for the next several years. Click on H024’s AAA registration and just look at the EPD’s of the bull we just designed.

GB Fireball 672 (H021's sire) has sure fire calving ease, carcass quality and added performance. Now combined that with double digit Calving Ease, top 10% growth and you have a big-time curve bender spread. He offers a combination of Marbling and Rib Eye Area EPDs that are unmatched by any other active sire in the Angus breed today, also a significant sire line to use for advantages for foot quality, muscle and \$Beef. His +346 \$Combined index and +16 CED puts him among the top active multi-trait sires in the breed today.

Priced; \$7,000

1860 GB Fireball 672 H027, Reg: AAA 19949192, Bull, Birth Date: 09/16/2020 Tattoo: H027
DNA Tested, Parentage: SNP, Genomic: Angus GS, Parents Qualified.

H027 brings Calving Ease, Weaning Weight, Yearling Weight and **C.A.B. Certified Genetics** to the table at a great value. He is a son and Grandson of some serious 1%'ers; GB Fireball 672 & G A R Sure Fire 6404. We have taken those "Beef" genetics and we have bred that to some of the worlds best Grass-fed Genetic Super-Stars, like OCC Dixie of Erica 816B and OCC Emblazon 854E and we have struck "Gold". Top 15% WW, Doc, Claw, Angle, Top 20% YW, Marb, \$G, Top 30% CED and so balanced across the boards. Oh, by the way for those of you that are tired of being run over by your bull take a look at his Docility EPD, that's what I want and need in a herd bull.

GB Fireball 672 (H021's sire) has sure fire calving ease, carcass quality and added performance. Now combined that with double digit Calving Ease, top 10% growth and you have a big-time curve bender spread. He offers a combination of Marbling and Rib Eye Area EPDs that are unmatched by any other active sire in the Angus breed today, also a significant sire line to use for advantages for foot quality, muscle and \$Beef. His +346 \$Combined index and +16 CED puts him among the top active multi-trait sires in the breed today.

Priced; \$6,000

1860 GB Fireball VAR H029, Reg: AAA *19949169, Bull, Birth Date: 09/17/2020 Tattoo: H029

DNA Tested, Parentage: SNP, Genomic: Angus GS, Parents Qualified

H029, Ooooooh SNAP! Say hi to the genetic families you just can't get without paying big bucks at the farm about?? 44 Farms "Super Sire" V A R Discovery 2240, G A R Complete N281, G A R Complete N281, GB Team" of GB Fireball 672 & G A R Sure Fire 6404. Oops forgot the ladies; G A R Complete N281, GB Ambush 269 & 44 Farms "Super Sire" V A R Discovery 2240. Now at auction the bidding will be fast and gritty because this type of breeding (\$Beef X Grass-fed) creates results that speak for themselves & speak to what a lot of us need in our herds, an animal that can live & work on "Grass". Feed bills are getting out of control. Let's design the perfect bull at an exceptional value. Let's add in Calving Ease, it is always nice but only if you can get

some gain on those calves (this one has it). Then I want an option to sell at Weaning Weight or background them a little longer and still keep them gaining (this one has it). A Covid Scare may come back around, I want to be ready, not with just some home-grown beef but the "Best in Texas" home-grown beef, I want to survive in style if the world goes crazy, (this one has it). Dad never sells a heifer, and I can see why when you are producing the best (no one can match what you are doing for your ranch with this bull). Talk about improvements in every category and Jump ahead Generations with this bull's genetics. Click on H029's AAA registration and just look at the EPD's of the bull we just designed. Top 1% \$G, Top 2% CED, Top 3% SC, Marb, Top 5% RE, 15% CEM, \$W, \$B, & \$C and more. **C.A.B. Certified Genetics in the Top 1% \$G & 3% Marb!** (this one has it).

GB Fireball 672 (H021's sire) has sure fire calving ease, carcass quality and added performance. Now combined that with double digit Calving Ease, top 10% growth and you have a big-time curve bender spread. He offers a combination of Marbling and Rib Eye Area EPDs that are unmatched by any other active sire in the Angus breed today, also a significant sire line to use for advantages for foot quality, muscle and \$Beef. His +346 \$Combined index and +16 CED puts him among the top active multi-trait sires in the breed today.

Priced; \$7,500

1860 Absolute N Bar EXT H031, Reg: AAA 19913236, Bull, Birth Date: 10/09/2020 Tattoo: H031

DNA Tested, Parentage: SNP, Genomic: Angus GS, Parents Qualified

H031 His Daddy "Bruce" produced over \$3000,000 as a part time cover bull to our extensive AI program, I often wonder if I should have given up on the AI work and just used "Bruce"?? Well now you can make that decision as you add to the Foundation of your Herd with great genetics from some of the best. S A V Final Answer 0035, GAR-EGL Protégé, **DH D Traveler 6807** and **N Bar Emulation EXT (Google these two)**. Let's add in some of the best Dams to ever calve; Thomas Miss Lucy 5152, Rita 7M89 of Rita 5FH8 Pred, O C C Juanada 709V & Sedgwicks Barbara 087. 6 Angus Pathfinders in his 3-generation pedigree. Bulls with a sound History, will Lead your Herd into the Future with sound production.

Priced; \$3,500

1860 GB Fireball 672 H032, Reg: AAA *19949202, Bull, Birth Date: 09/11/2020 Tattoo: H032.

DNA Tested, Parentage: SNP, Genomic: Angus GS, Parents Qualified

H032 is a "King of Grass-fed X \$Beef Genetics"! **C.A.B. Certified Genetics to boot!** This is a Prodigious Breeding that has shaped a Combination of EPD's that may be unmatched for a "Grass-fed X \$Beef" Sire. If you ever wanted to collect semen for a commercial herd that lives on grass and needs to produce beef, this is your sire. Let's "Build-a-Bull" just the way we would need one, if we wanted it to work on big open land, have the feet and legs needed to work all day and cover some ground, stay strong on forage, pass on some serious grass-fed capabilities, make use of the forage available, have the Dry matter Intake and RADG to put weight on his calves and have the \$EN (energy) that surpasses the average angus by far. Now, what about the Maternal Side (some of my cows are ready to move on, but it would take a Fantastic Heifer to make that happen)! Well, this is your best shot at making that happen. H032 has just the right EPD's to make your heifers the some of the best your cows can produce by adding genetics that are picture-perfect in each area(s) of EPD's; "Production", "Maternal", "Management", "Carcass" & \$Values (without going so far that you start to lose the Maternal capabilities)! B.S. aside a cows got to have milk to raise a bigger than average calf to weaning weight & most cows need a boost in that area, he's got it. Also, I need my new heifers and cows to take advantage of Calving Ease (I am not out there all night) and Heifer Pregnancy (which is taking longer in some sire's progeny), \$M & \$C. Cow and calf "Structure", almost every average cow can use improvement in Claw & Angle, this boy has it. The calves to keep and back-ground are the ones that can put on weight, have marbling, \$G, \$W, and come from a **C.A.B. Certified Sire** so you get top dollar when you sell and Bonuses for High Choice and Prime if you retain. Look him up at AAA if you need to see the EPD's or Pedigree, outstanding animal is all I can say.

GB Fireball 672 (H021's sire) has sure fire calving ease, carcass quality and added performance. Now combined that with double digit Calving Ease, top 10% growth and you have a big-time curve bender spread. He offers a combination of Marbling and Rib Eye Area EPDs that are unmatched by any other active sire in the Angus breed today, also a significant sire line to use for advantages for foot quality, muscle and \$Beef. His +346 \$Combined index and +16 CED puts him among the top active multi-trait sires in the breed today.

Priced; \$5,950

1860 GB Fireball 672 H033, Reg: AAA *19949153, Bull, Birth Date: 09/10/2020 Tattoo: H033

DNA Tested, Parentage: SNP, Genomic: Angus GS, Parents Qualified

H033 is a "**1'er**"!! Out of "all" of the young up & coming bulls in the American Angus Association he is in the Top 1% in Calving Ease & Top 1% in Heifer Pregnancy. The "Holly Grail" we are all after, in a herd Sire. Easy calving for our girls and a high weaning weight, is what a cow/calf operation is all about. If you want to make a herd improvement take a look at

what this GB Fireball son has to offer. Now I listed below a Top 40% HP, because with all of the 1% & 3% EPD's, it is hard to find a sire that can even come close to a above average Heifer Pregnancy. You can have all of the calves in the world but if your heifers are not worth retaining then you are out spending the money you just made, on replacement heifers you could have produced out of your favorite Ladies. Now let's look at where he comes from; On his daddy's side he is a GB Fireball 672 son, a GAR Sure Fire 6404 Grandson (both serious 1%'ers), on his mamma's side he is a Grandson of HA Cowboy Up 5405 (yes that one), a GG son of AARTEN X 7008 SA, HA Blackcap Lady 1602 & Basin Chloe OT16. Now that is adding to your genetic foundation in a most impressive way. **C.A.B Certified Genetics! This is one extremely well-balanced bull.**

Top 1% CED	Top 4% \$G	Top 10% RADG	Top 35% Fat
Top 1% \$W	Top 5% YW	Top 15% \$M	Top 40% HP
Top 3% \$C	Top 10% WW	Top 20% \$F	Top 40% YH
Top 3% RE	Top 10% \$B	Top 20% CW	
Top 3% BW	Top 10% CEM	Top 30% Doc	
Top 3% Milk	Top 10% Marb	Top 35% MW	

Priced; \$14,500

1860 GAR Absolute H036, Reg: AAA *19980558, Bull, Birth Date: 09/25/2020 Tattoo: H036

DNA Tested, Parentage: SNP, Genomic: Angus GS, Parents Qualified

H036 is a "Son of Bruce", who produced over \$3000,000 as a part time cover bull to our extensive AI program, I often wonder if I should have given up on the AI work and just used "Bruce"?? H036 is a Heifer bull, Herd Sire with Calving Ease that still has Grid Factor, Marbling, Ribeye, DMI, RADG and \$EN. Simply stated he is a bull that can work on grass and good forage and produce some outstanding calves. Take a look at his Daddy on our web site, keep in mind he is grass-fed only! This young man's pedigree may be the foundation genetics your looking for to move your herd up a notch. Here are just a few; Connealy Consensus 7229, KCF Bennett Absolute, GAR-LGL Protégé, SAV Final Answer 0035, Thomas Miss Lucy 5152, Rita 7M89 of Rita 5FH8 Pred, WK Unique Peggy 6018 & EXAR Unique Peggy 2146. Wow, what a set of genetics to bring back to the farm.

Priced; \$3,500

1860 Rampage OA36 H039, Reg: AAA 19949277, Bull, Birth Date: 09/27/2020 Tattoo: H039

DNA Tested, Parentage: SNP, Genomic: Angus GS, Parents Qualified

H039 is a Rampage Son! He brings "Grass-Fed X \$Beef" to the entire breeding program. We took one of the best cow families in our "Grass-fed" world, his MGD, Sedgwicks Barbara 087 and AI bred her to Quaker Hill Rampage OA 36 to produce a bull with **C.A.B Certified Genetics** that excels on forage. I love it when a plan comes together. This young man is in the Top 15% \$EN (Cow Energy Value (\$EN), expressed in dollar savings per cow per year (more dollars saved on feed energy expenses). H039 is a Plus 8 on Calving Ease and will improve Structure Performance to both Claw @ Top 3% and Angle @ Top 35%. Now if you want to raise some home-grown beef for your friends and family Top 20% Marbling and Top 20% \$G is what will put you into beef your family will brag about. He brings with him the incredible genetics of OCC Emblazon 854E, GAR Predestined and Boyd New Day 8005, not to mention the Quaker Hill Farms Blackcap cow family.

Quaker Hill Rampage OA36 is the Angus breed's #1 sire for registrations in 2018. He is one of the most popular bulls in the industry and highly proven and time tested. Breed leader for \$Beef, \$Feedlot and \$Weaning Indexes. Sound structured and powerfully constructed with incredible growth and performance. Highly reliable curve bender and carcass value with over 12,000 progenies registered at AAA. Top 20% Weaning Weight, Top 25% Yearling Weight, Top 30% RADG, Top 15% DMI plus

Priced; \$4,950.

1860 GB Fireball 672 H042, Reg: AAA 19949197, Bull, Birth Date: 09/22/2020 Tattoo: H042

DNA Tested, Parentage: SNP, Genomic: Angus GS, Parents Qualified

H042 is the "Benchmark" that "Grass-Fed X \$Beef" breeding is striving to achieve!

First to attain the hard to realize **C.A.B Certified Genetics**, these genetics he will pass-on to his progeny. Second to be a balanced breeding animal that will improve every breeding by giving more than 50% of his genetics to the offspring.

"More than 50%" you say! How would you know that?

Simple when we DNA test we "Confirm that the Parents Qualified" once that happens we can go back through the family tree and verify Accuracy (or the reliability that can be placed on the EPD's), next the Number of Registered Births (to sires, Dams, GGS...), next how many Pathfinders are in their 3-generation pedigree (identifies superior animals in the breed based on their records of performance), next how they (parents, Grand Parents...) stand up in the Angus Breed with their Phenotypical Traits (does their Angus Look match their EPD's, no one wants a Great EPD Bull that looks wimpy) and finally does their family tree have the "Foundation Genetic" that you want or need to improve your herd "Dramatically"!

H042 is a "Super Balancer" bull his EPD's combine "Grass-Fed X \$Beef" genetics with just the right power to Production, Maternal, Management, Carcass & Production (with a little extra Umph in the \$ Values; \$M, \$W, \$G, \$B & \$C, just to make you proud of your new bull).

About "Accuracy" in his 3-generation pedigree his Sires, Grand Sires & Great Grand Sires have over 52,261 AAA registered calves, to build the data accuracy from! All of these are just tools in your Bull Information Knowledge tool chest, but using the right tools can help you pick out a outstanding bull that

will meet your needs. 3 Pathfinders in his 3-generation pedigree. Phenotypical Look, well just google any of his sires, he has the look.

EPD's, Balanced and Powerful, well just look him up on AAA for all of the numbers. Here is a quick peek, Top 35% Calving Ease, Top 35% WW (two very nice numbers together), Top 15% Claw, Top 10% Angle, Top 2% Marb, 2% \$G, Top 20% \$W, \$B & \$C, WOW! Whoop and there is more!

GB Fireball 672 (H021's sire) has sure fire calving ease, carcass quality and added performance. Now combined that with double digit Calving Ease, top 10% growth and you have a big-time curve bender spread. He offers a combination of Marbling and Rib Eye Area EPDs that are unmatched by any other active sire in the Angus breed today, also a significant sire line to use for advantages for foot quality, muscle and \$Beef. His +346 \$Combined index and +16 CED puts him among the top active multi-trait sires in the breed today.

Priced; \$5,950.

1860 GAR Absolute H043, Reg: AAA 19980560, Bull, Birth Date: 09/20/2020 Tattoo: H043

DNA Tested, Parentage: SNP, Genomic: Angus GS, Parents Qualified

H043 is a way to add in genetics and Pathfinders to your herd's foundation. With 5 Pathfinder Greats than have been instrumental in improving herds all over there are some Genetics that will boost your herd as well; S A V Final Answer, OCC Emblazon 854E, Summitcrest Complete 1P55 & K C F Bennett Absolute. A herd bull who produced over \$3000,000 as a part time cover bull will look like at about 3.5 years old, on the AI work and just go to www.1860Farm.com (does their Angus Look match their EPD's, no one wants a Great EPD Bull that looks wimp). You've got a nice bull. Add to that some great cow families like; Thomas Miss Lucy 5152, Rita 7M89 of Rita 5FH8 Pred, Sedgwicks Barbara 087 & Garretts E Bar V Annie 3149 and some "Foundation Genetics" that improve your herd.

Priced; \$3,500.

1860 GAR Absolute H046 Reg: AAA *19913242, Bull, Birth Date: 11/21/2020 Tattoo: H046

DNA Tested, Parentage: SNP, Genomic: Angus GS, Parents Qualified

H046 is a "Son of Bruce", who produced over \$3000,000 as a part time cover bull to our extensive AI program, I often wonder if I should have given up on the AI work and just used "Bruce"?? H046 is a Heifer bull with Top 10% CED and Top 10% BW! A future Herd Sire with Calving Ease that still has \$F and a very good Weaning Weight. Simply stated he is a bull that can work on grass and good forage and produce some outstanding calves. Take a look at his Daddy on our web site, keep in mind he is grass-fed only! This young man's pedigree may be the foundation genetics you're looking for to move your herd

up a notch. Here are just a few of the 5 Path Finders in his 3 generation Pedigree, OCC Emblazon, KCF Bennett Absolute, GAR-LGL Protégé, SAV Final Answer 0035, Thomas Miss Lucy 5152, Rita 7M89 of Rita 5FH8 Pred and so much more! Wow, what a set of genetics to bring back to the farm.

Priced; \$3,750.

1860 GAR Absolute H050 Reg: AAA *19913242, Bull, Birth Date: 11/22/2020 Tattoo: H050

DNA Tested, Parentage: SNP, Genomic: Angus GS, Parents Qualified

H050 may be what you are looking in a herd bull that combines C.A.B. Certified Genetics 5 Angus Pathfinders and some and Foundation Families most would dream to have in their herd. We took the DNA test of 44 Eileenmere 4822 and matched her to GAR Absolute D5388 and hit a Home Run! Talk about "Grass-Fed X \$Beef" in a breeding, H050 achieved some great EPD's as well as an incredible Phenotypical look that is outstanding.

First he attain the hard to realize C.A.B Certified Genetics, these genetics he will pass-on to his progeny. Second to be a balanced breeding animal that will improve every breeding by giving more than 50% of his genetics to the offspring.

"More than 50%" you say! How would you know that?

Simple when we DNA test we Confirm that the "Parents Qualified" once that happens we can go back through the family tree and verify Accuracy (or the reliability that can be placed on the EPD's), next the Number of Registered Births (to sires, Dams, GGS...), next how many Pathfinders are in their 3-generation pedigree (identifies superior animals in the breed based on their records of performance). Next how the (parents, Grand Parents...) stand up in the Angus Breed with their Phenotypical Traits (does their Angus Look match their EPD's, no one wants a Great EPD Bull that looks wimpy) and finally does there family tree have the "Foundation Genetic" that you want or need to improve your herd "Dramatically"!

This one hits it "out of the park"!

Let's build a bull- we all want Calving ease Top 20%, a good Birth Weight, but not to good Top 35%, then we would love for that calf to have a great growth spurt toward a great Weaning Weight Top 30%, and a good Yearling Weight would be nice as well Top 25%.

Well Let's move on to Carcass Merits, CW Top 40%, Marb Top 15%, RE Top 45%, and if we bred him to Dairy Top 15% \$AxH.

Now let's talk \$ Values-\$W Top 40%, \$F Top 30%, \$G Top 15%, \$B Top 20% and \$C Top 35%!

Talk about a well-Balanced animal H050 is your man!

How do you top that- simple VAR Discovery, AAR Ten X 7008 SA, GAR-EGL Protégé, SAV Final Answer are on the Top Side.

44 Eileenmere 4822, 4S Eileenmere 3128, Rita, Thomas Miss Lucy such a powerhouse of sought-after genetics you can add to every calf!

Priced; \$5,950.
